

Start your engines!!!

Dr. Callum Lamont is a GPT1 trainee who joined Brecken Health Bunbury in January 2022. Callum has always been a petrol head and raced go-karts in London from a young age but only started competing in motorsport in 2019. Since then, the car has gone from strength to strength and is now a regular podium contender with Brecken Health Racing currently sitting 3<sup>rd</sup> in the Motorsport Australia Formula Vee 1200 WA State Championship.

The cars are only 475kg including the driver and are powered by a 1200cc Volkswagen engine. Race meets happen around 9 times per year and it's a real family event so if you have a petrol head in the family, please feel free to bring them down to any of our race events and they can have a sit-in the car. Callum is proudly sponsored by Brecken Health and would like to thank them again for sponsoring the car this year.
